Subject index for Volume 16

Abdominal wall defects 73–81
Accuracy, of infant mortality rates 16–22
ACTH 98–99
Anaesthesia
  and SIDS 82–89
Analgesia
  and SIDS 82–89
Antenatal care 305–313
Area of residence
  and leukaemia 154–165
Augmented labour
  and operative delivery 115–123
Autopsy, importance of 350–354

Birth length
  and HPA 274–277
  and PKU 274–277
Birthweight
  after a perinatal death 23–32
  and blood pressure 200–209
  and cardiovascular disease 194–199
  and child development 33–46
  and maternal age 67–72
  and maternal education 67–72
  and maternal nutrition 194–199
  prior to perinatal death 23–32
  very low 131–140
Birthweight, low
  time trends 8–15
Birthweight-specific mortality 383–385
Bladder control, age at 52, 57–60
Blood pressure
  and birthweight 200–209
Brain tumours
  and maternal use of hair dyes 226–235
  in Costa Rica 219–225
Breast feeding
  and parental smoking 236–245
  and weight gain 355–360, 361–369
Breast milk 355–360

Caesarean section
  after induction of labour 90–96
  and SIDS 82–89
  in labour 115–123
Cancer *see* Leukaemia, Brain tumours
Cause of death
  and birthweight of siblings 23–32
Central nervous system tumours *see* Brain tumours
Cerebral palsy
  by gestation 172–180
  mortality 375–382
Child development 33–46
Co-habitation outside marriage
  and preterm delivery 124–130
Congenital malformations 73–81
  and birthweight of siblings 23–32

Consanguinity 61–66
Creamatocrit 355–360

Day of birth
  and temperature 188–189
Developmental milestones 47–60 *see also* Child development
Diabetes *see* Maternal diabetes, Gestational diabetes
Diethylstilboestrol 98
Disability, childhood 61–66
Down's syndrome 314–319
Draw a man, age at 52, 57–60
Dyes, hair
  and brain tumours 226–235

Enteroparasites 166–171
Environmental tobacco smoke 236–245
Epidural analgesia
  and operative delivery 115–123
Epilepsy
  and mortality 375–382
Ethnic origin
  and child development 33–46

Ferritin levels
  and subsequent preterm delivery 297–304
Fetal deaths, registration bias 16–22
Fetal fibronectin
  and induction of labour 90–96
Forceps delivery 115–123

Gastroschisis 73–81
Gestational age *see also* Preterm
  and cerebral palsy 172–180
  and child development 33–46
  cleaning of 181–187
Gestational diabetes
  and outcome of pregnancy 290–296

Haemoglobin
  and SIDS 82–89
Haematocrit
  and SIDS 82–89
Hair dye 226–235
Head circumference
  and HPA 274–277
  and PKU 274–277
Health care
  and neonatal mortality 305–313
Hearing disability 61–66
  and mortality 375–382
Housing
  and pregnancy outcome 255–262
HPA *see* Hyperphenylalaninaemia
Hyperphenylalaninaemia and birthweight 274–277
Hypothermia 288–289

Income
  and childhood infection 166–171
Induction of labour 90–96, 263–273
  and Caesarean section 90–96
  and operative delivery 115–123
Infant mortality
  accuracy of 16–22
  among triplets 141–148
Infection
  and income 166–171
  and leukaemia 154–165
  and malnutrition 166–171
  and maternal education 166–171
  neonatal strep 334–341
Israel, registration of mortality 16–22

Labour, length of
  and SIDS 82–89
Leukaemia
  and infection 154–165
  in Costa Rica 210–218
  in Hong Kong 154–165

Malnutrition
  and infection 166–171
Marital status
  and pregnancy outcome 255–262
  and preterm delivery 124–130
Maternal age
  and abdominal wall defects 73–81
  and birthweight 67–72
  and child development 33–46
  and childhood disability 61–66
  and operative delivery 115–123
  and pregnancy oestriol 149–153
  and pregnancy outcome 255–262, 320–327
  and preterm delivery 67–72
  and stillbirth 67–72
Maternal alcohol
  and pregnancy outcome 255–262
Maternal anaemia
  and SIDS 82–89
Maternal Body Mass Index
  and pregnancy oestriol 149–153
Maternal death 101–107
  and uterine rupture 110
Maternal diabetes 290–296
  and daughters' obstetric history 290–296
Maternal education *see also* Parental education
  and birthweight 67–72
  and childhood disability 61–66
  and induction of labour 263–273
  and infection 166–171
  and pregnancy outcome 255–262
  and preterm delivery 67–72
  and stillbirth 67–72
Maternal height
  and pregnancy oestriol 149–153
Maternal infection
  and SIDS 82–89
Maternal mortality *see* Maternal death
Maternal nutrition
  and birthweight 194–199
Maternal occupation
  and childhood disability 61–66
Maternal smoking
  and breast feeding 236–245
  and child development 33–46
  and pregnancy outcome 255–262
  validity of self-report 246–248
Maternal stress
  and pregnancy outcome 255–262
Maternal weight gain in pregnancy
  and oestriol levels 149–153
Mental disability 61–66, 375–382
Milk volume
  and infant weight gain 355–360
MOMA Study 108–114
Mortality
  infant 16–22
  in children with disabilities 375–382
Motor development 33–46
Muscle area, upper arm 41

N-nitroso compounds
  and childhood brain tumours 226–235
Necrotising enterocolitis 342–349
Neonatal group B strep. infection 334–341
Neonatal mortality
  and induction of labour 263–273
  and place of delivery 305–273
Neural tube defects 328–333
Norway, registration of mortality 16–22

Oestriol in pregnancy 149–153
Omphalocele 73–81
Operative delivery 115–123
Oxygen 288–289

Parental age difference 320–327
Parental education and child development 33–46
Parity
  and birthweight 67–72
  and child development 33–46
  and childhood disability 61–66
  and induction of labour 263–273
  and preterm delivery 67–72
  and stillbirth 67–72
Paternal age
  and Down's syndrome 314–319
  and pregnancy outcome 320–327

Paternal alcohol
and pregnancy outcome 258
Paternal occupation
and neural tube defect 328–333
Paternal smoking
and breast feeding 236–245
and pregnancy outcome 258
Perinatal death
and uterine rupture 110
Perinatal mortality 383–385
Phenylketonuria
and birthweight 274–277
Place of delivery 305–313
Placental abruption 82–89
Planned pregnancy and pregnancy outcome 259
Post mortem *see* Autopsy
Post-term delivery
and SIDS 82–89
Pre-eclampsia 290–296
Prenatal care *see* Antenatal care
Preterm delivery 124–130
among triplets 141–148
and child development 33–46
and cohabitation 124–130
and induction of labour 263–273
and marital status 124–130
and maternal age 67–72
and maternal education 67–72
and maternal ferritin levels 297–304
and NEC 342–349
and parental age difference 320–327
and SIDS 82–89
time trends 8–15
Private medical care
and operative delivery 115–123
Prolapsed cord
and SIDS 82–89

Randomised controlled trials 98–99
Rash in infancy
and leukaemia 154–165
Retinoblastoma 370–374
Roseola
and leukaemia 154–165
Retinopathy of prematurity 98–99
Risk 2–3, 4–7
Rural areas
and stillbirth 249–254

SGA
and parental age difference 320–327
SIDS 82–89, 387–388
Sisterhood method 101–107
Social development 33–46
STD
and SIDS 82–89
Stillbirth
among triplets 141–148
and area deprivation 249–254
and grandmaternal diabetes 290–296
and maternal age 67–72
and maternal diabetes 290–296
and maternal education 67–72
and parental age difference 320–327
in rural areas 249–254
Streptococcal infection 334–341
Stress *see* Maternal stress
Sucking characteristics 355–360
Sudden infant death syndrome *see* SIDS
Susceptibility to infection 166–171
Sweden, registration of mortality 16–22

Temperature of air
and number of births 188–189
Time trends
in abdominal wall defects 73–81
in induction of labour 263–273
in very low birthweight 131–140
Tonsillitis
and leukaemia 154–165
Transfer of mother in labour 278–285
Treatment decisions 5–7
Triplet deliveries 141–148
Twin comparisons
fetal growth and blood pressure 200–209

Urban areas
and NEC 342–349
and stillbirth 249–254
Urinary tract infections 82–89
USA, registration of mortality 16–22
Uterine rupture 108–114
Uterine scar
and uterine rupture 108–114

Vacuum delivery 115–123
Visual disability 61–66
and mortality 375–382

Walking, age at 52
Weight gain, infant
and breast milk 355–360, 361–369
